Second Quarter 2022 Highlights(1)

- Total net revenue was \$128.0 million in second quarter 2022 compared to \$142.1 million in second quarter 2021
- Total Billings in second quarter 2022 was \$117.5 million compared to \$185.1 million in second quarter 2021; We believe the decrease is due in large part to reduced engagement of subscribers and potential subscribers, as external economic and geopolitical factors continued to impact investor uncertainty and delayed purchases in the quarter
- Net income was \$34.0 million in second quarter 2022 compared to a net loss of \$8.4 million in second quarter 2021; the net loss in second quarter 2021 was primarily driven by \$47.4 million in stock-based compensation expense which related to Class B units under MarketWise, LLC's prior operating agreement which was terminated as a result of our go-public Transaction on July 21, 2021. For further information on stock-based compensation, see footnotes 1 and 2 to Table 1. Income Statement below
- Cash flow from operations ("CFFO") was \$26.8 million in second quarter 2022 compared to \$58.9 million cash inflow in second quarter 2021

1

- CFFO margin was 20.9% in second quarter 2022 compared to 41.5% in second quarter 2021
- Adjusted CFFO, a non-GAAP measure, was \$26.8 million in second quarter 2022 compared to \$59.4 million in second quarter 2021
- Adjusted CFFO margin, a non-GAAP measure was 22.8% in second quarter 2022 compared to 32.1% in second quarter 2021
- Deferred revenue was \$701.1 million as of June 30, 2022 compared to \$665.1 million as of June 30, 2021
- Paid Subscribers were 898 thousand as of June 30, 2022 compared to 1.0 million as of June 30, 2021
- Free Subscribers were 15.0 million as of June 30, 2022 compared to 12.0 million as of June 30, 2021
- (1) See "Key Business Metrics and Non-GAAP Financial Measures" below. For a reconciliation of Adjusted CFFO and Adjusted CFFO margin, see "Cash Flow" below.

Mark Arnold, Chief Executive Officer of MarketWise, commented, "The macroeconomic environment has been challenging for many companies, including companies like ours involved with the financial markets. As the markets declined sharply, many individual investors moved to the sidelines, and this continues to impact our business. Given this environment, we are focused on increasing profitability by driving revenue, managing our marketing spend, and reducing overhead where it's appropriate."

Mr. Arnold continued, "While our business has been impacted by the current operating environment, our focus on profitability and improvements in operating efficiency will help position us well once the current state of volatility passes and individual investors re-engage. We continue to produce positive cashflow and enjoy a strong and loyal following with subscribers, especially our long-term subscribers. We also continue to add analysts and content to provide best-in-class actionable financial research for our subscribers, all while maintaining a very strong balance sheet with over \$150 million in cash and no debt. With the changes that we have made to our cost structure and the initiatives and opportunities I see in front of us, we are in a good position going forward."

Cost Reduction Initiative

The Company initiated a cost reduction program in July 2022, targeting lowered total expenditures, both through a reduction in overhead, and through a reduction in direct marketing expense. In total, between our initial round of overhead cost cuts, and the second phase of overhead cost cuts, which is being identified now, we anticipate reducing overhead by an annualized amount of approximately \$37 million, or 15% of 2022 budgeted overhead. Of this total amount, approximately 75% is from items that were in the March year-to-date run-rate of overhead. As a result of phase one of these overhead cuts, we would expect to see a reduction to the monthly run-rate of overhead costs of approximately \$1.7 million beginning in July. As we complete phase two of the overhead cost cuts, we would expect to see the total reduction to the monthly run-rate of overhead costs approximate \$2.5 million as we move into the fourth quarter. In addition to the reduction in overhead costs, given the current high CAC environment, we expect to spend \$37 million less in direct marketing in the second half of 2022 as compared to the first half, which should result in a \$6.2 million reduction to the monthly run-rate of direct marketing beginning in July. This represents an approximate 20% reduction to the annualized direct marketing spend originally expected.

Second Quarter 2022 Financial & Operational Results

Total net revenue decreased by \$14.1 million, or 9.9%, to \$128.0 million in second quarter 2022 compared to \$142.1 million in second quarter 2021. The decrease in net revenue was primarily driven by a \$13.6 million decrease in term subscription revenue.

Term subscription revenue decreased during second quarter 2022 primarily due to lower Billings as compared to the 2021 period — our second highest Billings quarter ever — which was driven by reduced engagement of subscribers and potential subscribers in the 2022 period, as well as lower overall conversion rates.

Billings decreased by \$67.6 million, or 36.5%, to \$117.5 million in second quarter 2022 compared to \$185.1 million in second quarter 2021. While second quarter 2022 Billings decreased from prior year, given that second quarter 2021 was our second highest quarter ever, we did not expect to show year-over-year growth. We believe the decrease is due in large part to post-COVID reduced engagement of subscribers and potential subscribers. This began in the second half of 2021 as consumers prioritized travel and leisure in lieu of spending time focusing on their investments. First quarter 2022 brought additional challenges with uncertainty stemming from external factors such as 40-year high inflation, volatility across asset classes, federal reserve tightening, and the war in Ukraine. These same factors have persisted into second quarter 2022, which we believe further contributed to subscribers and potential subscribers delaying their purchases.

Billings decreased by \$18.5 million, or 14%, to \$117.5 million for second quarter 2022 as compared to \$136.0 million for first quarter 2022. While consumer engagement remained consistent in second quarter 2022 compared to first quarter 2022, and our overall conversion rate, high value and ultrahigh value conversion rates all remained stable, the average Billings per sale declined in second quarter, which drove the decline in Billings from first quarter 2022.

Net income was \$34.0 million in second quarter 2022 compared to a net loss of \$8.4 million in second quarter 2021. We recognized stock-based compensation expenses related to the new 2021 Incentive Award Plan and the ESPP of \$2.4 million in second quarter 2022, and stock-based compensation expenses related to the Class B Units of \$47.4 million in second quarter 2021.

Cash flow from operations decreased by \$32.1 million, or 54.5%, from \$58.9 million in second quarter 2021 to \$26.8 million in second quarter 2022. Cash flow from operations for second quarter 2022 was primarily driven by net income of \$34.0 million adjusted for net non-cash factors which reduced cash by \$8.2 million, and net changes in our operating assets and liabilities which reduced cash by \$1.0 million, largely due to timing differences in the net receipt of cash.

Adjusted CFFO decreased by \$32.6 million, or 54.9%, from \$59.4 million in second quarter 2021 to \$26.8 million in second quarter 2022, primarily driven by a decrease of \$67.6 million in Billings. Adjusted CFFO this quarter was impacted by net changes in working capital, excluding changes in deferred revenue and changes in deferred contract acquisition costs, which increased cash by \$13.5 million, largely due to a significant decrease in accounts receivable this quarter. The difference between Adjusted CFFO and CFFO in second quarter 2021 is stock-based compensation associated with \$0.5 million of profits distributions to the original Class B unitholders.

Total Paid Subscribers decreased by 97 thousand, or 9.7%, to 898 thousand as of June 30, 2022 compared to 1.0 million at June 30, 2021, driven by a combination of decreased overall consumer engagement as the economy reopened in mid-2021, an outsized new subscriber cohort from first quarter 2021 yielding additional churned subscribers in first quarter 2022, combined with an overall challenging economic environment that has persisted through second quarter 2022.

Total Paid Subscribers decreased by 11 thousand, or 1.2%, to 898 thousand as of June 30, 2022 as compared to 909 thousand as of March 31, 2022. We believe the volatile stock market, high-inflation environment, and fears of recession have left subscribers and potential subscribers hesitant to engage or reengage as they assess the latest economic data and the Federal Reserve's potential next steps. These trends, which began in first quarter 2022, have continued to slow our new subscriber acquisition through second quarter 2022.

Free Subscribers increased by 3.0 million, or 25.1%, to 15.0 million at June 30, 2022 compared to 12.0 million at June 30, 2021, as our significant lead-generation efforts that began in earnest during late 2018 and intensified during 2019 and 2020 with the expansion across multiple brands, continued during 2021 and through second quarter 2022.

Free Subscribers increased by 0.5 million, or 3.1%, to 15.0 million as of June 30, 2022 as compared to 14.5 million as of March 31, 2022. This growth was driven by our continued lead generation efforts.

Key Business Metrics and Non-GAAP Financial Measures

In this release we discuss certain key business metrics, which we believe provide useful information about the Company's business and the operational factors underlying the Company's financial performance. We are not aware of any uniform standards for calculating these key metrics, which may hinder comparability with other companies who may calculate similarly titled metrics in a different way.

Billings is defined as amounts invoiced to customers.

Free Subscribers are defined as unique subscribers who have subscribed to one of our many free investment publications via a valid email address and continue to remain directly opted in, excluding any Paid Subscribers who also have free subscriptions.

Paid Subscribers are defined as the total number of unique subscribers with at least one paid subscription at the end of the period.

Average revenue per user or ARPU is defined as the trailing four quarters of net Billings divided by the average number of quarterly total Paid Subscribers over that period.

We also discuss certain measures that are not determined in accordance with GAAP, namely Adjusted CFFO, and Adjusted CFFO Margin. We use Adjusted CFFO and Adjusted CFFO Margin to evaluate our ongoing operations and for internal planning and forecasting purposes. We believe that non-GAAP financial information, when taken collectively, may be helpful to investors because it provides consistency and comparability with past financial performance, and assists in comparisons with other companies, some of which use similar non-GAAP financial information to supplement their GAAP results. This non-GAAP financial information is presented for supplemental informational purposes only and should not be considered a substitute for financial information presented in accordance with GAAP and may be different from similarly titled non-GAAP measures used by other companies. A reconciliation is provided above for Adjusted CFFO and Adjusted CFFO Margin to the most directly comparable financial measure stated in accordance with GAAP. Investors are encouraged to review the related GAAP financial measure and the reconciliation of this non-GAAP financial measure to its most directly comparable GAAP financial measure.

Adjusted CFFO is defined as net cash provided by operating activities plus profits distributions to Class B unitholders included in stock-based compensation expense, plus or minus any non-recurring items.

Adjusted CFFO Margin is defined as Adjusted CFFO as a percentage of Billings.

We believe that Adjusted CFFO and Adjusted CFFO Margin are useful indicators that provide information to management and investors about ongoing operating performance, to facilitate comparison of our results to those of peer companies over multiple periods, and for internal planning and forecasting purposes. We have presented Adjusted CFFO and Adjusted CFFO Margin because we believe they provide investors with greater comparability of our operating performance without the effects of stock-based compensation expense related to holders of Class B units that will not continue following the consummation of the Transactions, because all Class B units were converted into common units of MarketWise, LLC. Going forward, we will make certain tax distributions to our members in amounts sufficient to pay individual income taxes on their respective allocation of the profits of MarketWise, LLC at then-prevailing individual income tax rates. These distributions will not be recorded on our income statement and will be reflected on our cash flow statement as cash used in financing activities. The cash used to make these distributions will not be available to us for use in the business.

Adjusted CFFO and Adjusted CFFO Margin have limitations as analytical tools and should not be considered in isolation or as a substitute for analysis of other GAAP financial measures, such as cash flow from operations. Some of the limitations of using Adjusted CFFO and Adjusted CFFO Margin are that these metrics may be calculated differently by other companies in our industry.

We expect Adjusted CFFO and Adjusted CFFO Margin to fluctuate in future periods as we invest in our business to execute our growth strategy. These activities, along with any non-recurring items as described above, may result in fluctuations in Adjusted CFFO and Adjusted CFFO Margin in future periods.

Cautionary Statement Regarding Forward-Looking Statements

This press release contains forward-looking statements within the meaning of the federal securities laws, including statements regarding the financial position, business strategy, and the plans and objectives of management for future operations of MarketWise. These forward-looking statements generally are identified by the words "believe," "project," "expect," "anticipate," "estimate," "intend," "strategy," "future," "opportunity," "plan," "may," "should," "will," "would," "will be," "will continue," "will likely result," and similar expressions, but the absence of these words does not mean that a statement is not forward-looking. Forward-looking statements are predictions, projections, and other statements about future events that are based on current expectations and assumptions and, as a result, are subject to risks and uncertainties. Many factors could cause actual future events to differ materially from the forward-looking statements in this press release, including, but not limited to: our ability to attract new subscribers and to persuade existing subscribers to renew their subscription agreements with us and to purchase additional products and services from us; our ability to adequately market our products and services, and to develop additional products and product offerings; our ability to manage our growth effectively, including through acquisitions; failure to maintain and protect our reputation for trustworthiness and independence; our ability to attract, develop, and retain capable management, editors, and other key personnel; our ability to grow market share in our existing markets or any new markets we may enter; adverse or weakened conditions in the financial sector, global financial markets, and global economy; our ability to respond to and adapt to changes in technology and consumer behavior; failure to successfully identify and integrate acquisitions, or dispose of assets and businesses; our public securities' potential liquidity and trading; the impact of the regulatory environment and complexities with compliance related to such environment; the impact of the COVID-19 pandemic; our future capital needs; our ability to maintain an effective system of internal control over financial reporting, and to address and remediate existing material weaknesses in our internal control over financial reporting; our ability to maintain and protect our intellectual property; and other factors beyond our control.

The foregoing list of factors is not exhaustive. You should carefully consider the foregoing factors and the other risks and uncertainties described in the "Risk Factors" section of our filings with the U.S. Securities and Exchange Commission (the "SEC"), including our Annual Report on Form 10-K for the year ended December 31, 2021. These filings identify and address other important risks and uncertainties that could cause actual events and results to differ materially from those contained in the forward-looking statements. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this press release may not occur and actual results could differ materially and adversely from those anticipated.

Forward-looking statements speak only as of the date they are made. Readers are cautioned not to put undue reliance on forward-looking statements, and we assume no obligation and do not intend to update or revise these forward-looking statements, whether as a result of new information, future events or otherwise. We do not give any assurance that we will achieve our expectations.

Total stock-based compensation expense	\$ 2,449	\$	47,445	\$	5,037	\$	648,520

Note: During 2021 our stock-based compensation expense primarily stemmed from certain provisions of MarketWise, LLC's prior operating agreement and related to the value of newly vested Class B units under that agreement, profits distributions to Class B unitholders, and the change in value of previously vested Class B units. Our Class B units were classified as derivative liabilities as opposed to equity and remeasured to fair value at the end of each reporting period, with the change in fair value included in overall stock-based compensation expense. However, following the consummation of the Transaction, MarketWise, LLC adopted a new operating agreement and all Class B units were converted into common units of MarketWise, LLC, so all the stock-based compensation associated with those Class B units being categorized as derivative liabilities ceased. During 2022, stock-based compensation is based upon any stock-based compensation associated with our 2021 Incentive Award Plan and our Employee Stock Purchase Plan and is in line with stock-based compensation that may be seen at companies similar to MarketWise.
