# IMPORTANT INFORMATION

## Cautionary Statement Regarding Forward-Looking Statements

This presentation (this “Presentation”) contains forward-looking statements within the meaning of the federal securities laws, including statements regarding the financial position, business strategy, and the plans and objectives of management for future operations of MarketWise, Inc. (the “Company,” “we,” “us,” or “our”). These forward-looking statements generally are identified by the words “believe,” “project,” “expect,” “anticipate,” “estimate,” “intend,” “strategy,” “future,” “opportunity,” “plan,” “may,” “should,” “will,” “would,” “will be,” “will continue,” “will likely result,” and similar expressions, but the absence of these words does not mean that a statement is not forward-looking. Forward-looking statements are predictions, projections, and other statements about future events that are based on current expectations and assumptions and, as a result, are subject to risks and uncertainties. Many factors could cause actual future events to differ materially from the forward-looking statements in this Presentation, including, but not limited to: our ability to attract new subscribers and to persuade existing subscribers to renew their subscription agreements with us and to purchase additional products and services from us; our ability to adequately market our products and services, and to develop additional products and product offerings; our ability to manage our growth effectively, including through acquisitions; failure to maintain and protect our reputation for trustworthiness and independence; our ability to attract, develop, and retain capable management, editors, and other key personnel; our ability to grow market share in our existing markets or any new markets we may enter; adverse or weakened conditions in the financial sector, global financial markets, and global economy; our ability to respond to and adapt to changes in technology and consumer behavior; failure to successfully identify and integrate acquisitions, or dispose of assets and businesses; our public securities’ potential liquidity and trading; the impact of the regulatory environment and complexities with compliance related to such environment; the impact of the COVID-19 pandemic; our future capital needs; our ability to maintain an effective system of internal control over financial reporting, and to address and remediate existing material weaknesses in our internal control over financial reporting; our ability to maintain and protect our intellectual property; and other factors beyond our control.

The foregoing list of factors is not exhaustive. You should carefully consider the foregoing factors and the other risks and uncertainties described in the “Risk Factors” section of our Quarterly Reports on Form 10-Q, Annual Reports on Form 10-K, the registration statement on Form S-4 and proxy statement/prospectus filed with the U.S. Securities and Exchange Commission (the “SEC”) and other documents filed by us from time to time with the SEC. These filings identify and address other important risks and uncertainties that could cause actual events and results to differ materially from those contained in the forward-looking statements. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this Presentation may not occur and actual results could differ materially and adversely from those anticipated.

Forward-looking statements speak only as of the date they are made. You are cautioned not to put undue reliance on forward-looking statements, and we assume no obligation and do not intend to update or revise these forward-looking statements, whether as a result of new information, future events or otherwise. We do not give any assurance that we will achieve our expectations.

## Financial Information; Non-GAAP Financial Measures

The financial information and data contained in this Presentation is unaudited and does not conform to Regulation S-X

This Presentation also includes certain financial measures not presented in accordance with generally accepted accounting principles (“GAAP”) including, but not limited to, Adjusted CFFO, Adjusted CFFO Conversion, Adjusted Free Cash Flow, and Adjusted Free Cash Flow Margin and certain ratios and other metrics derived therefrom. The Company defines Adjusted CFFO as net cash provided by operating activities plus profits distributions to Class B unitholders included in stock-based compensation. The Company defines Adjusted Free Cash Flow as Adjusted CFFO minus capital expenditures. The Company defines Adjusted CFFO Conversion as Adjusted Free Cash Flow divided by Adjusted CFFO. The Company defines Adjusted Free Cash Flow Margin as Adjusted Free Cash Flow divided by Billings (i.e., amounts invoiced to customers). These financial measures are not measures of financial performance in accordance with GAAP and may exclude items that are significant in understanding and assessing the Company’s financial results. Therefore, these measures should not be considered in isolation or as an alternative to net income, cash flows from operations or other measures of profitability, liquidity or performance under GAAP. You should be aware that the Company’s presentation of these measures may not be comparable to similarly-titled measures used by other companies.

The Company believes these non-GAAP measures of financial results provide useful information to management and investors regarding certain financial and business trends relating to the Company’s financial condition and results of operations. The Company believes that the use of these non-GAAP financial measures provides an additional tool for investors to use in evaluating ongoing operating results and trends in and in comparing the Company’s financial measures with other similar companies, many of which present similar non-GAAP financial measures to investors. These non-GAAP financial measures are subject to inherent limitations as they reflect the exercise of judgments by management about which expense and income are excluded or included in determining these non-GAAP financial measures. For a reconciliation of these non-GAAP figures to the nearest measure determined under GAAP, please see the appendix to this Presentation.

This Presentation also includes certain projections of non-GAAP financial measures. Due to the high variability and difficulty in making accurate forecasts and projections of some of the information excluded from these projected measures, together with some of the excluded information not being ascertainable or accessible, the Company is unable to quantify certain amounts that would be required to be included in the most directly comparable GAAP financial measures without unreasonable effort. Consequently, no disclosure of estimated comparable GAAP measures is included and no reconciliation of the forward-looking non-GAAP financial measures is included.

## Industry and Market Data

In this Presentation, the Company rely on and refer to certain information and statistics obtained from third-party sources which they believe to be reliable. The Company has not independently verified the accuracy or completeness of any such third-party information.

1. Includes free and paid subscribers

2. Based on trailing four quarter net billings / average number of trailing four quarter paid subscribers

3. Billings represents amounts invoiced to customers

4. Adjusted FCF Margin = Adjusted FCF / Billings. Adjusted FCF is calculated as Adjusted CFFO - Capital Expenditures. Adjusted CFFO is calculated as net cash provided by operating activities plus profits distributions to Class B unitholders included in stock based compensation expense

5. Adjusted CFFO Conversion = (Adjusted CFFO - Capital Expenditures) / Adjusted CFFO

# KEY DRIVERS OF OUR SUCCESS

## POWERFUL CONTENT PLATFORM

- Compelling content fosters relationships between readers and editors, creates customer loyalty and brand goodwill
- Insightful and engaging content drives conversion users from free to paid subscribers
- Focus on proven formula to launch & scale new products in a low-risk capital way

## CUSTOMER FOCUS

- Customer centricity through every stage of a subscriber's journey
- Emphasis on developing long-term relationship with the subscriber
- Consistent 90%+ revenue retention

## SCALABLE MODEL

- Industry-leading ROI on new customer acquisition
- Upsell to higher ARPU products with almost all of the upsell revenues falling to the bottom line

## DATA / TECHNOLOGY

- Real-time campaign feedback, AI and rapid scalability
- Machine learning and advanced analytics drive increased upsell yield

# INVESTMENT HIGHLIGHTS

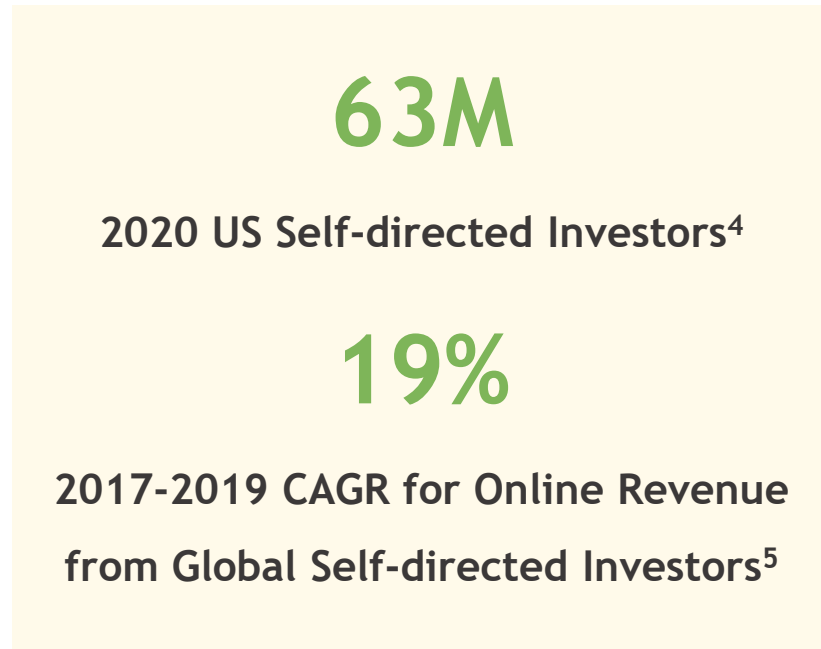

1	Significant and growing “attention economy” TAM	✓	\$191B TAM with significant tailwinds, ripe for disruption
2	Scalable, digitally delivered IP	✓	Market leading tech platform with scalable, high-value content, data & analytics
3	Large, thriving community	✓	~13M self-directed investors, growing at a 73% CAGR from Q2 2019 to Q2 2021
4	Diversified product suite	✓	12 primary customer facing brands offering 160+ products
5	Best in class financial profile	✓	“Adjusted Rule of 50” <sup>1</sup> financial profile: Scale, Growth, Recurring Revenue, High Adjusted FCF <sup>2</sup> (Low Capex)
6	Experienced leadership team	✓	Deep, long-tenured & proven team
7	Sustained growth outlook	✓	Multiple organic & inorganic avenues to potentially drive sustained profitable growth at scale

1. Adjusted Rule of 50 equals annual GAAP Revenue Growth Rate plus Adjusted FCF Margin. Adjusted FCF Margin = Adjusted FCF / Billings

2. Adjusted FCF is calculated as Adjusted CFFO (Cash Flow From Operations) - Capital Expenditures. Adjusted CFFO is calculated as net cash provided by operating activities plus profits distributions to Class B unitholders included in stock based compensation expense

# FINANCIAL WELLNESS SOLUTIONS HAVE A HUGE TAM

1. As per BMO research report, October 2018

2. Represents an estimated 33.3% of the 63M U.S. self-directed investors (Celent, U.S. Self-Directed Market Study, 2019) x MarketWise's 2020 ARPU of \$759. The remaining 67% is believed to be covered in the Asset Managers and Financial Information market sizes

3. Reflects addressable market of asset management customers becoming self-directed investors, based off of management fees for 2019 global active core and active specialties per BCG Global Asset Management Research Report, 2020

4. Celent, U.S. Self-Directed Market Study, 2019; 63M represents Celent's estimate for 2020

5. Maia Research, 2015-2027 Global Self-Directed Investors Implications for Wealth Managers Industry Market Research Report, Segment by Player, Type, Application, Marketing Channel, and Region

"...the markets are no longer reserved for institutional investors or HNWI. The goal of **democratizing the financial markets** is becoming a reality"

CELENT

# PERSONAL INVESTING IS CHANGING IN FAVOR OF MARKETWISE

## AGING POPULATION

- 17% of U.S. population is 65+<sup>1</sup>
- 10,000 Americans retiring every day, creating consistent demand velocity<sup>2</sup>

## GROWING THE PIE

- 72% of millennials identify as self-directed investors<sup>3</sup> (~\$22T of net worth)<sup>3</sup>
- Rise of self-directed 'Robinhood' investors provides huge future upside

## VOLUME OF ACTIVITY

- Retail investors now represent ~20% of trading on any given day, up from ~10% in 2010<sup>4</sup>

## COMPLEXITY

- Increasing number and complexity of investment instruments (e.g., ETFs, options, crypto, et al)

## PERFORMANCE

- Individual investors have a 3-year return performance lag versus the S&P 500<sup>5</sup>

## EDUCATION

- Increased emphasis on financial literacy - knowledge & skill to effectively manage wealth

1. Statista  
2. Deutsche Bank  
3. Deloitte study  
4. Wall Street research  
5. realinvestmentadvice.com

## SPAC Investor

### It's Time to Buy the World's Most Shareholder-Friendly SPAC

When it comes to SPACs, sponsorship is critical. One of the main criticisms of SPACs is the time spent for being sponsors.

SPAC managers aren't granted a salary or other 20% of the initial equity raised once the merger is completed.

If a deal is made, that 20% becomes valuable.

The sponsors sometimes also purchase heavy placement around the time of the initial public offering. If the SPAC liquidates without having completed the warrants end up being worthless.

Sponsors don't receive any of the liquidation proceeds. You can likely see how this situation effectively sponsors of the SPAC to complete an acquisition deadline to merge with a company approach because any merger is better than no merger.

As a result, much of SPAC value destruction is certain contractual features that mis-incentivize.

Even if the share price tanks by 50% after the millions of dollars that they can sell for a profit with only half their money.

MONTHLY BRIEFING |

## UNVEILING THE 2021 PORTFOLIOS

This is it!

If you just joined Stansberry Portfolio Solutions over the past couple weeks, welcome aboard! We're delighted to have you with us.

If you've already been with us for years, welcome back. Our model portfolios once again produced excellent returns in 2020. We hope you profited from our recommendations.

To the many subscribers who have written in reporting outstanding personal results... thank you. Nothing is more rewarding in our professional lives than knowing we've helped people build and secure their finances.

Now it's time to do it again...

In today's letter, we'll unveil our full 2021 portfolios... with all the details about what to buy and how much of each name to hold. But first, we want to review a few points on how to use this product so you can generate the best possible outcomes and fulfill your investment goals.

For returning subscribers, some of this information may feel like a review. But I still encourage you to read through it to make sure we're all on equal, sturdy footing as we embark on the path to profitable investing in the year ahead.

THE MONTHLY BRIEFING, EXPLAINED

Portfolio Solutions

### 1. Portfolio Manager Investment Commentary

Each month, I'll open our Briefing with a short and hopefully helpful investment note. In general, I look to provide thoughts on at least one of the three following topics...

1. What's moving the markets right now and how that may impact our longer-term investment outlook.
2. Specific investment rationale for a particular company, asset, or sector we're recommending in Portfolio Solutions. (Understanding *why* you own what you own is key to any successful investment.)
3. Broader investing lessons and guidelines meant to inform not just your investments in Portfolio Solutions but, ideally, your entire investment plan.

At the end of this Investment Commentary, you'll see performance figures for how we're doing so far that year. Behind the scenes, we remain focused on the longer-term performance of these portfolios. But we know you want to see what we've done for you lately, so we always show you how the strategies are performing monthly and on a year-to-date basis from the start of our "fiscal year." (This year, that's based on closing prices as of February 4, 2021.)

For newer subscribers, I encourage you to read the following opening commentaries to help familiarize

# BUILDING RELATIONSHIPS AND HELPING SUBSCRIBERS

MONTHLY BRIEFING | JANUARY 2021

## MAINTAINING MARGIN OF SAFETY IN AN UNSAFE INVESTING WORLD

BY AUSTIN ROOT

For each of your investments, what's your safety?

As a subscriber to Stansberry Portfolio Solutions, you have access to many of our company's top published reports. This means you've likely seen this term used by some of our sharpest analysts and editors. But what does it mean?

Brilliant investor Seth Klarman explains in his 1991 opus, *Margin of Safety: Risk-Averse Strategies for the Thoughtful Investor*.

Klarman may not be a household name, but since founding his hedge fund, the investment manager has produced one of the best track records of all time – always while his investments had an appropriate margin of safety.

His book on the subject is one of my favorites. I encourage you to read it, if you have a chance. The book has been out of print for a long time, but you can find a cheap used copy on Amazon right now.

## EMPIRE Investment Report

### A 'FinTech' Solution for an Unexpected Corner of the Market

Fresno, California, seems an unlikely place for a financial revolution to start...

The city is an agricultural hub right in middle of the Central Valley. With production of grapes, almonds, cotton, and other crops, Fresno County is the No. 1 agricultural producing county in the U.S. It's the home of David sunflower seeds and Sun-Maid raisins.

But the origin of a major financial innovation that's used even more widely than the city's agriculture is a bit less likely.

Back in the 1950s, consumers were broadly familiar with the idea of a credit card. In 1950, Diners Club was introduced after the founder had to turn to his wife to pay for a business lunch. His balance had to be paid off monthly.

On the other hand, local bank cards had rollover credit. This allowed them to balance off over time. However, they were limited to their region and were only willing to accept the credit from banks they knew.

In 1958, a Bank of America (BAC) executive named Joseph P. W. combined the two. He envisioned a card that would allow the cardholder to use it at a wide variety of merchants who would also accept it.

And of all places, he selected Fresno as his initial market to roll out the credit card.

Credit cards are known as a "two-way platform." To be effective, they need acceptance on two sides – from both merchants and consumers. Fresno was the market because it allowed just that...

For merchants, who often provided their own individual credit to their customers, the idea of a credit card was a double-edged sword. It was a way to get paid, but it was also a way to get paid by someone else.

#### IN THIS MONTH'S ISSUE:

• Growing a household name

• A 'FinTech' solution for an unexpected corner of the market

#### TRUE WEALTH SYSTEMS Monthly Issues

### The New Bull Market Outside of the Melt Up

STEVE JUGGERUD

January 7th, 2021 | Monthly Issues

Add to Bookmarks Print

#### Our Shot at Hundreds-of-Percent Gains in Just Three Years

Goldman Sachs has been trimming the fat in one key area of its business.

That might surprise you. The Melt Up is underway, after all. Initial public offerings ("IPOs") are booming. And Goldman – one of the world's dominant investment banks – is in the perfect position to benefit from what's going on.

So what gives? Where is the company making cuts in times like these?

Surprisingly, it's in a part of the market that it used to dominate. Back in the day, Goldman used to have one of the top commodity trading desks. But thanks to a multiyear bear market in commodities, the company's presence there has dwindled.

You see, two nails can seal the coffin of any commodity trading desk...

The first is a long-term downtrend in prices. When that happens, it's tough for even the best traders to weather the storm.

#### TWS Instant Read

**U.S. Stocks:** The Melt Up continues and our systems are as bullish as ever.

**Foreign Stocks:** Many foreign markets are hitting new highs. And we have plenty of buy signals outside the U.S.

**Commodities:** After a terrible decade, our computers are flashing "buy" once again. This could be the start of a long-term boom.

<b>Total Stock Based Compensation Expense</b>	<b>78,627</b>	<b>47,445</b>

1. Our stock-based compensation expense stemmed from certain provisions under the governing documents from the original partnership and primarily relates to the value of newly vested Class B units under our original operating agreement, profits distributions to Class B unitholders and the change in value of previously vested Class B units. Our Class B units were classified as derivative liabilities as opposed to equity and remeasured to fair value at the end of each reporting period until settlement into equity, with the change in value included in overall stock-based compensation expense. However, following the consummation of the proposed transaction with Ascendant Digital Acquisition Corp. (the "Transaction"), we have adopted a new set of governing documents and all Class B units will be converted into straight common units of MarketWise, LLC, so all the stock-based compensation associated with those Class B units being categorized as derivative liabilities will cease. The stock-based compensation going forward will be based upon any stock-based compensation associated with our new employee stock compensation plan and will be in line with stock-based compensation that you may see amongst companies similar to MarketWise.
